The UTHSC Blackboard system has a hierarchical roles structure that allows a variety of people to utilize the software to fit their unique needs. Here are some recommended guidelines to follow when designating roles in Blackboard:

⇒ Users should participate in training activities for their role before being assigned to the role.
⇒ Assign users to roles that give them enough access to perform their duties, while limiting their access to avoid interference with others’ responsibilities and content.
⇒ Routinely monitor and update the Blackboard roles assigned to people in your area based on personnel turnover, restructuring, and other factors that may affect the way people use Blackboard.
⇒ Add as few Course Directors/Instructors to your course as possible. Because of the unlimited access afforded to this role, you should limit the number of people enrolled in your course as Course Directors/Instructors to one or two enrollees.
⇒ Use the full Banner Course Name and Number in all of your courses
⇒ Do *not* have multiple copies of the same course in Blackboard.
⇒ All Blackboard users must have a UT NetID. If the user is
not UT personnel, a UTHSC faculty or staff member must submit request to sponsor a NetID account for the user. Once a NetID has been assigned, the user then can be added to the UTHSC Blackboard system.

The following pages contain a listing of all of the roles available in the UTHSC Blackboard System. This list includes both the name of each role and the privileges that correspond to them. Use the guidelines outlined above when assigning users to these roles.
**Blackboard Role Assignment Guidelines**

**UTHSC Blackboard**

- **Course Director / Instructor**
  - Create/Edit/Delete/Copy Materials in Content Areas
  - Create/Edit/Delete/View Journal Entry
